A TIDAL WAVE OF TONERS IS FLOODING THE GROOMING AISLE

Five new variations on traditional, oil-fighting tonics are debuting this fall, targeting men's specific skin care needs. Some of these formulas include botanical extracts to soothe, while others contain exfoliants and antioxidants to rejuvenate dull skin. "Using a toner isn't always necessary, but it is a cleansing and refreshing step to incorporate into your regimen," says dermatologist Anna Guanche of Thousand Oaks, California. A daily swipe with a soaked cotton ball after washing up suits men with oily skin; once a week is usually enough for sensitive or dry faces. —SEAN KENNEDY
